**Verderlube is the lubricant / coolant used with the Verderflex® range of and other peristaltic or hose pumps**

**⚠ WARNING**

Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information

## **1 Identification of the Substance/Preparation and of the Company/Undertaking**

### **1.1 Identification of Substance or Preparation**

PRODUCT NAME	Verderlube®
CHEMICAL IDENTIFICATION	Glycerine based blend
CAS NUMBER	Preparation
USE	Food Grade - Pump Lubricant / Coolant

### **1.2 Company Identification**

PRODUCER / SUPPLIER	VERDER LIMITED WHITEHOUSE STREET HUNSLET LEEDS LS10 1AD GREAT BRITAIN
TEL NUMBER	+44 (0) 113 222 0250
FAX NUMBER	+44 (0) 113 246 5649
EMERGENCY TEL NUMBER	
For advice on this product call:	+44 (0) 113 222 0250

## **2 Composition / Information on Ingredients**

- This product contains no substances classified as hazardous to health in concentrations that should be taken into account according to EC directive 91/155/EC
- Main constituent may cause irritation to eyes and skin.
- Irritating to respiratory system in the form of a mist.

### 3 Hazardous Identification

This product is not classified as hazardous according to EC directive 91/155/EC

#### WARNING

- May cause irritation to eyes and skin.
- Irritating to respiratory system in the form of a mist.
- Contact with hot product may cause burns.
- Product is a lubricant and in the event of untreated spillage, can cause external surfaces to become slippery when wet

### 4 First Aid Measures

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

#### 4.1 Ingestion

- Give 500 ml of Water to drink
- DO NOT INDUCE VOMITING!
- Except as a deliberate act, the ingestion of large amounts of product is unlikely. If this should occur, do not; induce vomiting, obtain medical advice.

#### 4.2 Inhalation

- If inhalation of fumes from overheated material causes irritation to the nose or throat, or coughing, remove to fresh air. Obtain medical advice if any symptoms persist.

#### 4.3 Skin Contact

- Wash thoroughly with mild soap and water as soon as reasonably practical.
- Remove heavily contaminated clothing and wash underlying skin

#### 4.4 Eye Contact

- Wash eye thoroughly with copious amounts of water, ensuring eyelids are held open.
- Obtain medical advice if any pain or redness develops or persists.

### 5 Fire Fighting Measures

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

#### 5.1 Extinguishing Media

- Alcohol resistant foam, dry powder or water fog

## 5.2 Extinguishing Media To Avoid

- Do not use water jets

## 5.3 Unusual Fire and Explosion Hazards

- Avoid spraying directly into storage containers because of danger of boil over

## 5.4 Special Protective Equipment for Fire fighters

- Protective clothing and approved breathing apparatus when in close proximity of fire
- During burning, poisonous acrolein may be found

## 6 Accidental Release Measures

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant appropriate product information***

### 6.1 Personal Protection

- Wear goggles and gloves. If spillage has occurred in a confined space, ensure sufficient ventilation and check that a safe, breathable atmosphere is present before entry.

### 6.2 Environmental Precautions

- Protect drains from spills and prevent entry of product. Treated effluent may be biodegradable. Recover cleaning water for later treatment.

### 6.3 Methods for Cleaning Up

- Contain and recover liquid, soak up with absorbent material (sand, peat, etc.) or contain and shovel into drums or containers. Remove residue by spraying with water

## 7 Handling and Storage

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

### 7.1 Handling

- Contact with hot product causes burns.
- Avoid contact with eyes. If splashing is likely to occur wear a full visor or chemical goggles to appropriate local national standards.
- Avoid frequent or prolonged skin contact with fresh or used product.
- Wash hands thoroughly after use.

## 7.2 Storage

- Store under cover away from moisture and sources of ignition. Do not overheat in storage.
- The lubricant/coolant is hygroscopic; keep the container tightly closed

## 8 Exposure Controls / Personal Protection

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

### 8.1 Personal Protection

- Hand Protection                   PVC or Rubber Gloves
- Eye Protection                    Chemical goggles
- Respiratory Protection       Respiratory protection is unnecessary, providing concentration of vapour, mists or fumes is adequately controlled.

### 8.2 Occupational Exposure Limits

- Ensure good ventilation.
- Threshold limit Not tested

## 9 Physical and Chemical Properties

FORM	Viscous liquid
COLOUR	Blue. Colourless may be supplied to special order
ODOUR	Odourless
SOLIDIFICATION POINT	-40°C / -40°F approx.
FLASH POINT	177°C / 350°F approx. (COC: ISO 2592)
BOILING POINT	290°C / 554°F
SOLUBILITY IN WATER	Miscible (at 20°C)
VAPOUR PRESSURE	(20°C / 68°F) <0.01 mbar (100°C / 210°F) <1mbar
VISCOCITY	700 mPaS approx. @ 20°C / 68°F
pH	7 approx.
AUTO IGNITION TEMPERATURE	400°C / 750°F approx.
EXPLOSION LIMITS	Not established
DENSITY (20°C/68°F)	1245 kg/m3 approx.
BEHAVIOUR WITH WATER AT 20°C	Hygroscopic

## 10 Stability and Reactivity

*Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information*

### 10.1 Conditions to Avoid

- Preparation is stable and unlikely to react in a hazardous manner under normal conditions of use.
- No special precautions other than good housekeeping of chemicals.
- Hazardous polymerisation reactions are unlikely to occur.
- This material is combustible.

### 10.2 Materials to Avoid

- Avoid contact with strong oxidizing agents, nitrogenous compounds and strong acids: risk of violent and or explosive reactions with pure compounds.

### 10.3 Hazardous Decomposition Products

- During burning, poisonous acrolein may be found – very toxic by inhalation.
- Incomplete combustion / thermal decomposition will generate smoke, carbon dioxide and hazardous gases, including carbon monoxide.

## 11 Toxicological Information

*Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information*

### 11.1 Toxicity Data

- General purpose food grade lubricant /coolant
- LD<sub>50</sub> oral (rat) 12600 mg/kg (not harmful) \*

## 11.2 Significant Data with Possible Relevance to Human Health

- Eyes - Unlikely to cause more than transient stinging or redness if accidental eye contact occurs
- Skin - Unlikely to cause harm to the skin
- Ingestion - Unlikely to cause harm if accidentally swallowed in small doses, although larger quantities should be avoided
- Inhalation - At ambient temperatures this product will be unlikely to present an inhalation hazard

## 12 Ecological Information

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

### 12.1 Mobility

- Spillage may penetrate the soil; unused preparation is food grade and is inherently harmless.

### 12.2 Persistence and Degradability

- This preparation is inherently biodegradable.

### 12.3 Bio Accumulative Potential

- There is no evidence to suggest that bioaccumulation will occur.

### 12.4 Aquatic Toxicity

- Verderlube is miscible in water. It is not considered harmful in low concentrations.

Water pollution reactors	gO <sub>2</sub> /g
BOD <sup>5</sup> :	0,87 (NEN 3235-5.4)
BOD <sup>1</sup> :	1.16 (NEN 3235-5.3)
Fish: goldfish	LC50 (24h):>5000 mg/1 (modified ASTM D1345)

- The aquatic toxicity (TLM<sub>96</sub>) is >1000mg/1, which is defined by NIOSH as an insignificant hazard

## 13 Disposal Considerations

***Used lubricant may become contaminated with pumped product, also verify precautions and advice against relevant product information***

### 13.1 Waste Disposal Method(s)

- Where possible, arrange for unused product to be recycled.
- Disposal of preparation should be via an authorized person/licensed waste disposal contractor in accordance with local regulations.
- Incineration may be carried out under controlled conditions provided that local regulations are met.
- Dispose of preparation and container carefully and responsibly. Do not dispose of preparation near ponds, ditches, down drains onto soil.

### 14 Transport Information

- Not classified as dangerous for transport (RID/ADR-ADNE-IATA-IMDG-MARPOL-ICAO)

### 15 Regulatory Information

- Classification - Classification not required

### 16 Other Information

- Employees of the Verder group have not experienced any harmful effect during normal handling and production.
- Verderlube® and Verderflex® are registered trademarks.
